Auto Dealer Website

Parnassus Creative Website Services has put together a website package targeted for vehicle sales dealers (small to medium sized dealerships).

The demonstration website you can visit is using the WordPress platform and the Car Demon Plugin. Please note that none of the vehicles listed on this site are really for sale anywhere and are only included for feature demonstration purposes of this website.

The WordPress Theme is custom designed by Parnassus Creative using Artisteer for optimum compatibility with the Car Demon Plugin.

The Car Demon Plugin is a specifically designed plugin to manage your vehicle inventory for the website. This plugin includes a number of Widgets which will enhance your vehicle sales website and provide your site visitors with the features many have come to expect to find on vehicle sales businesses' websites.

Parnassus Creative takes care of the initial site setup, plugin installations and configurations, and provides you with the training and documentation you'll want so that you can manage your on-line vehicle inventory.

Do you think this is too complicated to manage on your own?

Parnassus Creative takes care of the hard stuff for you, and then provides the training for you to manage your on-line vehicle inventory – you do not need to be a computer expert at any of this stuff.

Most of it for you is simply filling out an on-line form for each vehicle on your lot, uploading the associated vehicle photos, and then 'Publish' the form to have the new listing added to your website.

Added value – hosting your site on Parnassus Creative Hosting Cooperative includes:

Unlimited number of email accounts using your website's domain name, such as name@yourwebsite.com.

Unlimited remote storage capacities with our hosting service for your website files and email accounts.

No artificial caps on bandwidth usage from our hosting service – page loading time for your site's visitors is as fast as possible (may be affected by other factors such as the visitor's connection to the internet).

Access to Parnassus Creative's Client Help site – providing valuable information and training to our clients along with our technical support for most any issues you may

have.

Multi-device compatibilities built-in for your site visitors, whether it is their PC, Tablet, or Cell-phone they are using to visit your website.

How much does all of this cost you?

A whole lot less than you might think!

Even small dealerships usually will find that it is not a budget buster for this easy way of having a continuous internet presence potentially increasing traffic to your sales lots.

Visit:
